Click on the Expand icon  next to the Programming environment menu. Double click on Transactions.</p>

4. Perform the following action:

ABAP/4 Repository Information System: Transactions	
<i>Fields</i>	<i>User Actions and Values</i>
Max no. of hits	Change to 999 .

5. Click on the **Execute** icon .

6. At the **Transactions: (9nn hits) screen**, use the scroll bars to move to the end of the list.

Note: The report only shows 990 hits of the thousands of transaction codes. Remember the last transaction code to enter in step 11.

7. Click on the **Back** icon  to view or export the remaining transaction codes.

8. At the **ABAP/4 Repository Information System: Transactions** screen, click on the **Select: Include pattern** button to the left of the **Transaction** field.

9. At the **Transaction: Maintain Selection Options** window, click on the radio button to the left of the **Greater than** symbol.

10. Click on the **Enter** icon .

11. Perform the following action:

ABAP/4 Repository Information System: Transactions	
<i>Fields</i>	<i>User Actions and Values</i>
Transaction	Enter the last used transaction.

12. Click on the **Execute** icon .

13. Click on the **Back** icon  to view or export the remaining transaction codes. Continue this process until you've reached the end of all transaction codes.

14. Select the appropriate action:

To	Do
Export the transaction data to a file	Follow the menu path: System → List → Save → Local file At the Save list in file... window, click on the radio button to the left of unconverted. Click on the Continue icon  .
	At the Transfer List to a Local File window, type in the path and file name with a .txt extension. Click on the OK icon  .
	Repeat the steps above until all transaction codes have been exported.
Exit this procedure	Click on the Exit icon  .

END OF TRANSACTION
